

Prof. Ewan Blanch

RMIT University, Australia

Ewan Blanch was awarded his PhD in Physical Chemistry from the University of New England, Australia in 1996. After post docing at the University of Glasgow with Professor Laurence Barron he started a Lectureship at the University of Manchester, UK in 2003. In January 2015 he was appointed as a Professor of Physical Chemistry in the School of Applied Sciences at RMIT University in Australia. His research interests focus on using vibrational spectroscopies to understand biomolecular structure, function and disease; and the application of these methods to natural products, disease mechanisms, pharmaceutical bioformulation, nanosensor development and food science.
